

AKUREYRI AIRPORT — INTERNATIONAL GATEWAY

Akureyri International Airport has one runway which is 2,400 m long, 45 m wide and can safely accommodate the largest airplanes. The airport is controlled by highly qualified air traffic controllers (ATC). The approach control equipment and lighting system are up to the highest standards and include LOC, ILS and GPS approaches.

The fire and rescue service at the airport is in accordance with ICAO category 6 and can be raised to category 7 on request. There are always at least three (cat 6) to five (cat 7) employees on firefighting duty. Akureyri International Airport is located in North Iceland, which requires excellent winter services. The airport is very well equipped for snow removal and is open all year round. Further information can be found on: www.isavia.is/en/akureyri-airport
